

Three grille colors (included):  
White, metallic charcoal, semi-gloss black.

## HEAT WITHOUT SACRIFICING SPACE!

The perfect heater for rooms with limited wall space! Specifically designed to be recessed in the kickspace under kitchen cabinets or bathroom vanities. It can also be installed over kitchen cabinets (near the ceiling) or in stairwells.

# Kickspace Heater

## TWO SAFETY SYSTEMS

In the event of overheating, a thermal protection with automatic reset will switch off the heating elements. For increased safety, a second thermal protection—this one with a manual reset—is activated in case the first malfunctions.

## STURDY AND DURABLE CONSTRUCTION

- Durable tubular heating element with fins.
- Baked epoxy/polyester powder coating providing an ultra-durable, easy-to-maintain finish.

## Kickspace Heater

| Watts            | Heats an area of about <sup>1</sup> |       |
|------------------|-------------------------------------|-------|
|                  | sq. ft.                             | sq. m |
| 1000             | 100                                 | 9.29  |
| 500 <sup>2</sup> | 50                                  | 4.65  |

<sup>1</sup> Intended as a guide only. These calculations are based on a room with an 8 foot ceiling, R12 wall insulation and R20 ceiling insulation. The suggested heating capacity would then be able to keep the room temperature at 21 °C (70 °F) when the outdoor temperature is at -25 °C (-13 °F). The heating capacity required will vary depending on the area and volume of the room, the layout and orientation of the residence, its geographic location, type of construction, insulation and airtightness levels, as well as the size, type and orientation of the windows, etc.

<sup>2</sup> Wattage can be converted to 500W at the time of wiring (see installation instructions).

**One unit,  
two power settings**

**Two safety systems**

**Sturdy construction**
